

A10 CYCLONE

The Course Of Male Masturbation History Will Forever Be Changed!

The A10 Cyclone brings every man's dream of automated masturbation into reality. With its powerful rotating motor, the A10 Cyclone achieves the sensation of intercourse or fellatio through the uniquely designed interchangeable inner sleeves. The special PWM control of the R-1 gives the A10 Cyclone seven various spin patterns and seven levels of low to ultra high speed for a combination of 49 unique modes possible.

A10 Cyclone has an extra power battery pack enabling A10 Cyclone to be in use for well over an hour while maintaining its strong and powerful rotations.

Get A10 Cyclone Accessories To Enjoy The A10 More

By adding spacer discs (sold separately) you can fill up any possible gap between the main part and base of penis.

By changing the inner cup (sold separately) you are able to enjoy a totally different stimulation.

* This product needs the R-1 controller which is sold separately.

Speed control	Rotation pattern	0. Left Counter-clockwise rotations	1. Right Clockwise rotations	2. Skip 90 degrees back and forth rotation	3. Viking 180 degrees back and forth rotation	4. Ten Count 10 seconds rotations along with 3 seconds pause	5. Mountain gradual mountain pattern speed increase/decrease over 7 seconds	6. Quick Turn Big rotation clockwise with small rotation counter-clockwise	7. O'Briend 3 rotations to clockwise then 3 rotation counter-clockwise

All Different Sexual Pleasures Are Now Satisfied By This One Unit

R-1 CONTROLLER

Expandable Connects With Various Attachments

The R-1 controller is both the power supply and the control panel for the attachments. It controls all attachments through a mini USB socket at the top. This system allows simple control with complex functionality.

49+1 Various Control Ability

50 different settings can be produced with the R-1 unit. This is achieved by combining the 7 different patterns with 7 different speed/power settings. The center button may also act as a turbo or pause button depending on the attachment.

High tech function Advanced Power Supply Circuit

Energy conservation is made possible by inserting an optimized power supply circuit for the battery drive. The balance between power output and energy was studied and perfected to maximize the batteries' life.

FEEL MONT BLANC

The Best Clitoral Stimulation Comes From Both Vibration and Movement At The Same Time!!!

The Feel Mont Blanc's is specially constructed by separately assembling its head vibrating and rotating parts. This allows independent control of its vibration intensity from rotation speed. In addition, the Feel Mont Blanc's ergonomically shaped rubber head is covered with ticklers at its end which brushes the clitoris softly, giving the user strong ecstasy. Thanks to the 50 different combinations of modes, every woman can enjoy Feel Mont Blanc.

The rubber head is made with soft elastomer and during usage the ticklers begin to dance. This flexible elastomer material is gentle to the skin and very durable.

* This product needs the R-1 controller which is sold separately.

BACH ROTOR

Mega Power Vibrating Bullet

The original vibrating object within the bullet was developed by balancing the analyzed ratio of the motor and weight. With this unique design, Bach Rotor can produce vibrations twice as strong as a conventional bullet. The Bach Rotor can produce 50 different vibrating modes with the R-1 Controller. In addition, the cavity at the tip of the Bach Rotor was designed for clitoral stimulation.

By cupping the clitoris with this cavity, stimulations can be controlled at varied speeds and vibrations. The cavity will also function to attach future accessories currently under development, such as a spot stimulator and tickler cover.

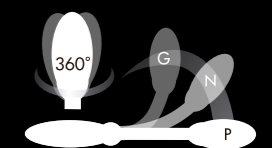

* This product needs the R-1 controller which is sold separately.

PREDATOR WAND

Next Generation Multi-Purpose Vibrator Designed To Maximize Your Pleasure

Predator Wand was developed using the technology behind the Bach Rotor. The long flexible neck rod allows the Predator Wand to be used in a multitude of positions. Clitoral massaging, vaginal thrusting, G spot and anal stimulation can all be done through the Predator Wand making it uniquely versatile for both male and female. The Predator Wand can produce 49 different modes plus turbo with the R-1 controller. Its handle is protected from its strong vibration while the motor has a super silent design.

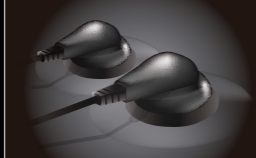

The head and neck part are covered with a soft elastomer that is gentle to the skin.

* This product needs the R-1 controller which is sold separately.

New Attachments For R-1 Controller Are Being Developed

NIPPLE STIMULATOR

A gadget designed specifically to stimulate nipples; one of the important sexual stimulation spots on the body. Its rotating motion around the nipple gives the pleasant sensation of being licked by a tongue.

A10 PISTON

This will be an electrical piston-type masturbator similar in size to the A10 Cyclone. By using a special structure in the piston's motion part, we are able to downsize the product making it a handy electrical piston-type masturbator.

R-1 Creates a New Platform.

What is the main advantage of an attachment based sex toy over the standard all-in-one product?

As different products are piled up in your collection, money was wasted in having multiple controllers for these products. Also these controllers were only designed to control a single product, limiting the technology in these simple controllers.

The R-1 controller provides the highest technology, giving every attachment a versatility like no other. The cost of attachments is also decrease without the need to buy a separate controller for each attachment you have.

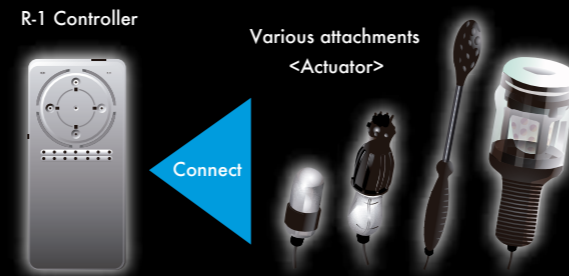

All attachments conveniently attach to the R-1 unit through the Mini USB port on top.

The conventional all-in-one type adult toy

Attachment type

Introduction of the R-1 series

R-1 Starter Set

R-1 Controller & Bach Rotor value combo.

The contents of the Starter Set
 R-1 Controller x 1
 Bach Rotor (Vibrator Bullet) x 1
 Size AA batteries x 3

* Only available as value set at the moment.

The attachments for R-1 controller

All R-1 sex toys are very sophisticated and well-thought-out. The R-1 Controller will give each connected toy its very own touch.

1. Feel Mont Blanc
2. Predator Wand
3. A10 Cyclone (Size C batteries x 3 / Spacer x 1 / Medusa Head x 1)

Accessories exclusively for A10 Cyclone

To customize the A10 Cyclone we created several accessories. It is possible to choose from different inner cups and adjust the length of shaft by adding distance discs.

4. Spacer set (3 pieces)
5. Inner cup: Medusa head
6. Inner cup: Crystal
7. Inner cup: Rolling Fella

All Made In JAPAN.

RENDS company profile : Rends stands for **Reality, Extravagant, Neat, Dream, Satisfaction**. Our company has been established in order to create high quality products that are planned, developed, and manufactured in Japan. We are a development manufacturer stemming from the biggest retailer of adult pleasure products of Japan with considerable experience. This experience allows us to accurately judge the needs of the customers as well as areas that can be improved within the adult toy industry. All these factors become the bases for our concepts and applied throughout our development of high quality products. As a global operating Japanese mechanical engineering manufacturer, we believe that the quality of our pleasure products should be equal to the standard that people all around the world expect from all Japan made electrical appliances.

R-1 concept : The next generation gadget made incorporating advanced Japanese technology designed by our engineering team. The members of our engineering team has a lot of experience from working in the labs of major Japanese electric manufacturer. Design, part selection, processing and assembling were all areas developed in a completely different and unique manner when compared to the conventional ones currently used within the adult toy industry. This enable us to create gadgets that were previously thought of as technologically impossible to make.
